REMI

In May 2024, we rescued Remi from a horrible auction in Ohio. She stood tied in a pen, head low, completely shut down. One look at her, and it was easy to see that she had a major problem. One hind foot was overgrown, causing her to walk with an awkward gait, her hoof landing unnaturally with every step. Her foot had obviously been injured at some point in her life, and we can only guess that her owners didn't know how to properly care for the injury. The strange muscling and slope of her whole hind end indicated that she had been dealing with this for many, many years. She moved slowly, with short steps and her hind legs sort of shuffling along.

We saved this kind, older donkey from almost certainly being bought by kill buyers only to be shipped to slaughter. There were no other private buyers interested in a crippled donkey. But, what everyone missed out on, is one of the sweetest, kindest donkeys that has ever come to our rescue!

Remi is SO perfect! She absolutely loves people and attention. Our vet and farrier have been working to slowly improve her hoof, and she is getting around better and better all the time. Remi will live out her years in safe sanctuary at Little Longears with all of the other senior donkeys.
